M-System does not provide mobile terminals (smart phones, tablets) or mobile network operator services.
A signal conditioner is used to condition and convert a field sensor signal suitable for processing with the PLC/DCS in a wide variety of process plants and factories. Typical applications are:

- **Signal conversion**
- **Signal isolation to stop ground loops**
- **Signal boosting to increase load drive capability**

M-System signal conditioners are available with wide combinations of process signal I/O, power input and mounting configuration. Additionally, M-System offers the broadest line of signal splitters available.

### ISOLATOR APPLICATIONS

Isolator is installed between a transmitter (i.e. sensor) and a receiver to galvanically isolate DC signals. Breaking the path between a field instrument and a control room device minimizes various influences coming from the field site to the control room.

In addition, each instrument separated by galvanic isolation can choose its own ground point independently from other ones, avoiding the ‘ground loop’ problem.

Lastly, the isolator can provide impedance conversion to beat loop impedance constraints, and signal level conversion (e.g. from 10-50 mA to 4-20 mA) function.

#### 4-wire isolator: 4-20 mA (passive) input / 4-20 mA output / Line powered

</table>

- **e.g.** M2DYS Fixed range
- **M2DYS** Fixed range, signal splitter
- **M3LDY** Programmable linearization

Basic isolator designed to interface a PLC and DCS system with a field instrument. The isolator module supplies 24 Vdc power to the field device and provides a linearized output signal if necessary.

- **Remote field signal monitored by control system**
- **Water/wastewater treatment**
- ** Petrochemical, tank farms, large manufacturing sites**
Compact Plug-in Signal Conditioners

M2 Series  M2E Series  W2 Series

- M2/W2 Series (Mini-M and Mini-MW) features wide selection of input/output ranges and functions
- M2E Series with bright, high-contrast OEL (Organic Electroluminescence) display for setting and process monitor
- W2 Series (Mini-MW) provides a second isolated output of independent range
- DIN rail or surface mounting
- 2000 Vac isolation
- Base socket included with the modules

Low-profile Signal Conditioners

M5 Series  B5 Series  W5 Series

- Only 41 mm (1.61 in) deep, terminal block style modules can be installed anywhere, even behind the panel cover.
- M5/W5 Series: Line powered type (4-wire)
- B5 Series: Loop powered type (2-wire)
- W5 Series provides a second isolated output of independent range
- DIN rail mounting
- 2000 Vac isolation

Thin-profile Signal Conditioners

M3S Series  M6 Series

- Space-saving modules with separable terminal blocks
- Universal AC/DC power input available
- Ultra-slim design
- Selectable connection styles: Tension-clamp, screw terminal or euro terminal
- Low power consumption, high load drive capability
- 2000 Vac isolation

Why Isolate the Second Output?

- Channel-to-channel isolation enhances the overall system reliability.

Whenever you want to add another device such as a recorder to a sensor signal loop connected to PLC's analog input module, a signal splitter that can output two isolated signals is recommended.

The loop's load capacity may allow to connect one more load in series to (4-20 mA current signal) or in parallel to (1-5 V voltage signal) an existing receiving instrument. However, in such a configuration, short-circuit, open-circuit or ground loop at one part of the loop could affect the entire system.

Galvanically separating each part of the loop is beneficial to contain any damage to the limited section in case of an accident, thus to making troubleshooting easier, minimizing the system downtime.

Programmable Signal Conditioners

**M3L Series**
“One-Step Cal” Configuration without PC

- Enhanced PC configurator software is also available
- Universal I/O specifications ideal for spare parts stock reduction programs
- DIN rail mounting
- 1500 Vac isolation

**B3 Series**
DIP Switch Configurable

- Input type and range selectable with the internal DIP switches and fine calibration using the front potentiometers
- Wide supply voltage range 12-45 Vdc
- 1500 Vac isolation between input and output

Field-mount Signal Conditioners

**B6U / B6U-B**
Universal HART Temperature Transmitters

- Plug-in two-line LCD display
- HART programmable
- User’s own temperature calibration tables can be used
- IP66 / IP67 field enclosure; Stainless steel optional

**27 / 26 Series**
Programmable Head-mount Transmitters

- 27 Series: HART or PC programmable type available
- 26 Series: Fixed range
- Function monitor LED optional for 27 Series RTD and potentiometer input

**FIELD-MOUNT ACCESSORIES**

- 6BX-E Enclosure
- 27HU Temperature Transmitter
- Spacer

**ISOLATOR APPLICATIONS**

4-wire isolator / current loop supply: 4-20 mA (active) input / 4-20 mA output (source) / Line powered

When the receiver powers the isolator’s output loop (sink)

- Remote field signal monitored by control system
- Water/wastewater treatment
- Petrochemical; tank farms, large manufacturing sites

Designed to interface a PLC and DCS system with a field HART transmitter. The isolator module supplies 24 Vdc power to the field device. It also allows the HART signal to pass when a technician needs to access the transmitter’s process and diagnostic information via the HART signal using a HART hand-held communicator (HHC), from any termination point of the loop at both sides of the isolator.

Field-mount Signal Conditioners

**B6U / B6U-B**
Universal HART Temperature Transmitters

- Plug-in two-line LCD display
- HART programmable
- User’s own temperature calibration tables can be used

Function Modules & Retrofit Products

Function Modules
- Math functions
- Process functions
- Filters
- Unique functions to ensure stable process operations and to solve problems in system upgrading

- Temp/pressure compensation
- Addition / Subtraction
- Multiplication / Division
- Ratio / Bias
- Delay buffer / Ramp buffer
- Moving average
- Lead time / Dead time
- Linearization
- Square root extraction
- Palmer-Borus flume / Parshall flume
- Triangular/v-notch/rectangular weir

- Inverted output
- High / Low limiting
- Track / Hold
- Peak / Valley hold
- High / Low selecting
- Channel switching
- Parameter generator

I/O CHARACTERISTICS EXAMPLES
- Delay buffer
- Lead time
- Inverted output
- Track / Hold
- Ramp buffer
- Dead time
- High / Low limiting
- Peak hold

Self-Synch Transmitter
M2EXS / MXS
- Converting position signals from a self-synchronizing motor into a DC signal proportional to the rotating shaft position
- Position indication using self-synch, tank gauge, sounding level meter

High Current Output Transmitters
VA / SVA / 99SVA
- 200 mA, 1 A output to drive actuators used in turbines, speed governors, hydraulic machinery
- Retrofitting 10-50 mA loop

Potentiometer Output
CVR1
- Remote setting for dampers, inverters, motors and other devices with potentiometer settings
- DC voltage/current input
- 135 Ω, 1k Ω and other outputs

I/P Transducer
HVP / HVPN
- Semiconductor pressure sensor in the feedback circuit
- Max. air capacity 60 Nl/minute

I/P Transducer for Air Conditioning

Motor Speed Setting
A limit alarm is used to provide one or more relay/contact outputs when a monitored process signal goes out of preselected high or low limits. Typical applications are:

- **Trouble warning (annunciators)**
- **Emergency shutdown**
- **ON/OFF control**

M-System limit alarms are available with wide combinations of process signal I/O and power input, featuring also various setpoint access means.

Programmable alarms feature enhanced programmable functions such as failsafe operation, deadband, delay time, latching relay and others, while analog alarms feature basic but easy setting.

### Programmable Alarms

**AS4 Series**

Dual/Quad Alarms with LED Display

- Simple configuration via the front Up/Down buttons with a help of two displays, by calling parameters’ ID numbers (ITEM) and choosing values (DATA)
- Direct sensor input: DC, temperature, potentiometer, strain gauge and CT
- Field selectable sensor type and range
- Dual SPDT or quad NO or NC output
- Process monitor

**M2EA / M7E Series**

Compact Alarms with OEL/LCD Display

- Multi-line display showing parameters and selection in text; intuitive, easy programming just like operating a cell phone
- Dual SPDT or quad NO or NC output
- PC configuration is also available

**KS2V2 / KS2TR2**

Panel Surface Mount

- 1/16 DIN size (48 mm square) panel cutout
- 1-5 Vdc input (KS2V2) or temperature (T/C or RTD) input (KS2TR2)
- Dual SPDT output

### Analog Alarms

- Various setting methods are available:
  - Dial setting
  - Thumwheel switch setting
  - Rotary switch setting
  - Potentiometer setting
- Direct sensor input type
- Extra DC transmitter output
A panel installed meter, digital or bargraph, provides not only process signal indication but also a combination of signal conditioning, limit alarm and control functions. Basic and extended applications are:

- Signal indication by LED or LCD display
- Signal conversion by transmitter output
- Alarm and emergency shutdown by relay outputs
- ON/OFF control by relay outputs

A field indicator is used for local indication for operators' convenience while signals from sensors and transmitters installed throughout a large installation of tanks and pipelines are typically transmitted to a control/monitoring station via 4-20 mA current line. The loop powered indicator is simple to install and wire, and reliable and durable in an explosive/corrosive environment.

### Digital Panel Meters

#### Bright, Colorful LED

**47L Series**
- 1/8 DIN size (96 x 48 mm)
- Red, Orange, Green, Bluegreen, Blue and White LED selectable
- 4 or 4 1/2 digit display
- Alarm and/or transmitter output optional
- IP66 front panel
- Separable terminal block

#### Large 0.8" High LED Display

**40 Series**
- 1/8 DIN size (96 x 48 mm)
- 3 1/2 or 4 digit display
- Display hold function

#### High Performance LCD Display

**47D Series**
- 1/8 DIN size (96 x 48 mm)
- 5 1/2 digit display plus small 20 segment bargraph
- Main display color can be changed from green to red in alarm
- Alarm and/or transmitter output optional
- 12 V or 24 Vdc sensor excitation
- RS-485 Modbus-RTU interface optional
- IP66 front panel
- Separable terminal block

#### 1/32 DIN Size Meters

**43 Series**
- 1/32 DIN size (48 x 24 mm)
- Easy-to-wire tension clamp connecting
- 24 Vdc powered or loop powered (no external power supply required)

Loop Powered Type: No external power supply required
Ultra-slim Digital Panel Meters
Flat Rear Surface Stuck to the Panel with a Magnet
47NL Series

- 1/8 DIN size (96 x 48 mm)
- 4 or 4 1/2 digit display
- Large 16 mm-high LED display: Bright and colorful
- Mountable on standard 30 mm round panel cutout
- IP 66 (except for magnet mounting)
- Moving average function to suppress display flickering
- High/low alarm trips
- Short-depth flat type

Bargraph Indicators

48N Series Bargraph Indicators
- 9/64 DIN size (36 x 144 mm) [IP65]
- 101-segment, 3 mm wide LED
- Red, amber, green and blue colors
- Alarm and/or transmitter output optional
- Vertical or horizontal mounting
- Custom scale with no extra cost
- IP65 front panel
- Separable terminal block

48SV2 Series Bargraph Indicators
- 18 x 72 mm size
- 51-segment LED
- Red, amber, green and blue colors
- Vertical or horizontal mounting
- Custom scale with no extra cost
- Zero & span adjustments at the front panel
- Separable terminal block optional

48NV Series
- Single or dual bars

48NA Series
- Single bar
- Dual/quad alarm

48ND Series
- Single bar
- Dual/quad alarm
- 4-digit digital display

Field Indicators

6DV / 6DV-B Loop Powered Field Indicator
- 4-20 mA input loop powered
- No external power source required
- Scaling & linearization selectable via the front control buttons
- IP66 / IP67 field enclosure, aluminium or stainless steel
- ATEX Zone 0, FM Class I, II, III, Division 1 approvals

2-WIRE LOOP APPLICATION EXAMPLE

The indicator is powered from a two-wire current loop (4-20 mA), requiring no external power source. The maximum voltage drop caused by inserting the 6DV into the loop is only 4.0 V at 20 mA. It is ideal for use as a remote indicator added to a current loop between a field sensor / transmitter and a monitoring / control room, without worrying about needing a power source or about loaded impedance on the loop.
IT Series Open Network Capable Tower Lights

- Energy saving, maintenance free LED lights
- Direct Modbus/TCP and CC-Link control saves wiring and cost
- Wireless LAN access point and infrastructure mode (IEEE 802.11b/g/n, 2.4 GHz)
- Bright and even illumination thanks to M-System’s original reflection system
- Number and color of LED modules can be freely combined
- Rugged IP65 construction is ideal for harsh industrial applications

**Modbus/TCP**

**CC-Link**

**TOWER LIGHT APPLICATIONS**

Remote monitoring and control of an equipment using mobile interface

No hardwiring between multiple sets of equipment to monitor and control by a single master PLC

The network capable tower lights can save a great part of parallel wiring between sensors, PLC and lights.

---

**TOWER LIGHT APPLICATIONS**

Remote monitoring and control of an equipment using mobile interface

- **Access Point**
  - **Wireless LAN**
  - **Images**
  - **Texts**
  - **Tablet**
  - **Smart Phone**

No hardwiring between multiple sets of equipment to monitor and control by a single master PLC

- **Access Point**
  - **Wireless LAN**
  - **Equipment**
  - **Client**
  - **Remote I/O**

The network capable tower lights can save a great part of parallel wiring between sensors, PLC and lights.
Transducers for electrical measurement are an essential part of any monitoring, measuring, or controlling system where electrical quantities are involved. For example, a power transducer monitors both AC current and voltage to measure/calculate true electrical power delivered to a load and converts it to a DC voltage or current signal proportional to the measured power.

Multi power monitors are capable of open network interface such as Modbus-RTU, Modbus TCP/IP, CC-Link and LONWORKS, which are commonly used for modern energy measurement and management systems to achieve energy saving.

53U / 54U Series
Multi Power Monitor and Transducer
- Single-phase 2-wire and 3-wire, three-phase 3-wire and 4-wire systems
- IP50 front panel (53U, 54U)
- Various network communication and Ao/Do combinations selectable
- Up to 31st harmonic distortion measurement
- Software lock

LT-UNIT Series Power Transducer
- True RMS sensing
- M4 screw terminal
- Max. 550 Vac input
- Conforming to IEC 60688
- DIN rail or surface mounting

LSMT4 Multi Power Transducer
- Measuring AC current, voltage, active/reactive/apparent power and power factor
- 10 x DC voltage/mA outputs plus 2 x Do
- Parameters are freely programmable with the front control buttons or by PC
- DIN rail mounted

L-UNIT Series
- Average or RMS sensing
- Economical dual channel type available
- DIN rail or surface mounting

K-UNIT Series
- Average or RMS sensing
- Plug-in socket mounted
- DIN rail or surface mounting
Start Your Energy Saving Program with a Minimum Time & Cost

Remote I/O for Energy Consumption Monitoring

- Data from power distribution panels scattered throughout a building/industrial installation can be monitored using local area Ethernet data network.
- Minimum down time by using clamp-on current sensors
- Three energy sensing ways selectable for easy application: energy computation via VT/CT, pulse output from energy meters, and pulse pickup at energy meters
- Integration of utility and process monitoring (e.g. flow, temperature, discrete signal) by mixing other sensor input modules on the R3 base

Three Energy Sensing Ways: System Configuration Example with a Commercial Building

R7MWTU / R7EWTU / R7CWTU / R7LWTU

- Clamp-on current sensor use: easy installation
- 2 systems input

R9MWTU / R9EWTU / R9CWTU / R9LWTU

- Clamp-on current sensor use: easy installation
- Up to 8 systems input
- Time stamped data logging in SD card

R3 Series Remote I/O

- 4-point totalized pulse input module for pulse pickups
- Other heavy current system input modules: AC voltage/current, zero-phase current, wattage
- Temperature, DC and other sensor signal inputs are also available
Remote I/O supports DCS/PLC systems by expanding I/O flexibility in addition to providing all full channel-to-channel isolation. It communicates directly to the PLC and DCS via industry standard open-protocol networks.

Remote I/O can also be used as stand-alone distributed I/O communicating with popular HMI software. It can be located remotely in the field, or within an instrumentation cabinet such as test stands.

The flexibility and scalability of M-System’s Remote I/O supports future system upgrades with full isolation between power-communication-I/O and between analog channels. Economical non-isolated analog modules are also selectable.

Applications include: signal concentrator, data collection in flow and level monitoring, injection molding monitoring and control, test stands and prototyping, glass furnace temperature control, paint booth environment reporting, pharmaceutical processes, and assembly line discrete ON/OFF.

Remote I/O

LARGE NUMBER OF I/O POINTS

R3 Series
Multi-channel, Mixed Signal Remote I/O
Hot Swappable Modules

R30 Series
Compact, Mixed Signal Remote I/O
Compact size

R8 Series
Slice Type, Mixed Signal Remote I/O
Flexible Configuration without Base

SMALL NUMBER OF I/O POINTS

R5 Series
Compact, Mixed Signal Remote I/O
Easy Access to Field Terminals

R6 Series
Ultra-Slim, Mixed Signal Remote I/O
Only 78 mm wide with 8 I/O modules

LARGE NUMBER OF I/O POINTS

R1 Series
Compact, Multi-point Remote I/O
12-point Universal Input Module

R7 Series
Expandable, Compact Remote I/O
Attached with Discrete I/O Extension Module
Remote I/O Applications

1. Replacing I/O modules of PLC and DCS
   - Flexible combinations of I/O modules
   - Eliminating point-to-point wires for each input

3. I/O solution for IoT terminals
   - Free combinations of I/O modules
   - Concentrating remote signals to a single network connection point
Mixed Signal Remote I/O

R3 Series
Multi-channel, Mixed Signal Remote I/O

- Wide selection of I/O modules including DC, AC, temperature, strain gauge, pulse trains, AC power, etc.
- 4 isolated to 16 non-isolated analog inputs per module
- Max. 64 discrete I/O per module
- Selections of AC power, CT and VT modules suitable for energy monitoring applications
- Dual redundant communication networks and power supplies
- 1500 Vac isolation

D3 Series
Multiplex Transmission System

- Max. 10 km (6.21 mi) transmission via twisted-pair cable
- No software programming required
- Interfacing field signals to the host PLC via Modbus-RTU or Modbus TCP/IP
- Free combination of I/O signals

PEER-TO-PEER COMMUNICATION WITHOUT NEEDING A MASTER
R30 Series
Compact, Mixed Signal Remote I/O
- Ethernet based network protocols
- High-speed internal bus
- 2 or 4 fully-isolated analog I/O per module
- 16 discrete I/O per module
- R3 Series I/O modules can be added by using a special connecting base
- Dual redundant communication networks and power supplies
- 1500 Vac isolation

R8 Series
Slice Type, Mixed Signal Remote I/O
- ‘Slice type’ modules can be freely added by necessary number of I/O points, saving installation space to the minimum
- Only 55 mm deep modules (except connector)
- Easy I/O terminal access via e-CON (mini-clamp) connector, MIL connector, or Tension-clamp terminal block

R6 Series Ultra-Slim, Mixed Signal Remote I/O
- Only 78 mm (3.07 in) wide with the minimum system of 8 modules
- Extension by 8 module units — Max. 31 I/O modules
- 2 fully-isolated analog I/O per module
- 4-point discrete I/O per module
- Low power consumption
- 1500 Vac isolation

R5 Series Compact, Mixed Signal Remote I/O
- 2 fully-isolated analog I/O per module
- Re-transmitted output modules suitable for extra field monitoring
- Dual redundant communication networks and power supplies
- 1500 Vac isolation

- Thermocouple input: 4 ch, ---, ---, ---
- RTD input: 4 ch, ---, ---, ---
- 4-20mA input with excitation: 4 ch, ---, ---, ---

**Discrete I/O Module**

- Discrete input: Di 16, ---, Di 4 / 16, Di 4, Di 4 / 16
- Discrete input with excitation supply: Di 8 / 16 / 32 / 64, Di 16, ---, ---, ---
- AC contact input: Di 16, ---, ---, ---
- Discrete input / output: Di 8, Do 8, ---, ---, ---
- Relay contact output: Do 8 / 16, ---, Do 4, ---, ---
- Open collector output (NPN): Do 16 / 32 / 64, Do 16, Do 16, Do 4, Do 4 / 16
- Open collector output (PNP): Do 16 / 32 / 64, Do 16, ---, Do 4, ---
- Triac output: Do 16, ---, ---, ---
- One-shot pulse output: Do 16, ---, ---, ---
- Remote control relay control: Do 8, ---, ---
- Photo MOSFET relay: Do 8, ---, ---, ---

**BCD Code I/O Module**

- BCD code input / output: 7-digit BCD, ---, ---, ---
All-in-One Style Remote I/O

R7 Series
Expandable, Compact Remote I/O

- Palm-top size compact module can handle 4 analog input, 2 analog output or 16 discrete signals.
- 8 or 16 discrete input/output module can be attached to the base module.
- 1500 Vac isolation

Compact Remote I/O for FA Control Equipment

R7 Series Compact Remote I/O for MECHATROLINK-I, -II, -III

- Motion and I/O networks can be on single MECHATROLINK line to save wires and cost
- High speed AD conversion and isolation of sensor signals
- Compact, terminal block style, all-in-one modules

I/O network signals introduced into MECHATROLINK network

High speed AD conversion of tension/pressure/weight measurement

R7 Series Compact Remote I/O for HLS

- Remote I/O modules for HLS (Hi-speed Link System) proposed by StepTechnica Co., Ltd.
- Compact, terminal block style, all-in-one modules
- Four connection styles are selectable to fit with various sensors and devices: e-CON (mini-clamp) connector, MIL connector, spring cage (tension-clamp) terminal and screw terminal

APPLICATION EXAMPLE WITH YOKOGAWA FA-M3 YHLS MASTER MODULE

- Chip shooter machines
- Semiconductor manufacturing equipment
- Injection molding machines
- Large printers
- LCD panel manufacturing equipment/Carrier devices
- Automatic carrier robots
- Welding machines
- Electrical discharge machines
- Warehouse management systems

YHLS (Yokogawa Hi-speed Link System) adopts a HLS-compliant open protocol, enhanced to allow easy monitoring of transmission line quality during development and operation of IT machine systems.

http://www.m-system.com
M-System’s model TR30-G is a web-based data acquisition system enabling users to view and access stored data via an internet browser. Freed from a dedicated display screen, accessibility and portability of the data is greatly enhanced.

In addition, users can receive free benefit of ever-evolving state-of-the-art user interface and apps provided by tablet terminals: i.e. ultra-high resolution screen, intuitive touch panel operations, entering comments by dictation or handwriting, capturing a screen shot and e-mailing, etc.

At the maximum of 64 analog inputs (16-bit data), 64 discrete inputs, 64 discrete outputs, 32 pulse inputs (32-bit data) plus 32 function inputs (mathematical, logic, filter, etc.) are usable. At the maximum of 120 channels can be plotted on the charts and stored at the storing cycle of 1 minute. The fastest storing cycle is 5 milliseconds for 16 channels, 100 milliseconds for 32 channels.

Freedom from dedicated display screen - Enhanced data accessibility and portability

PLANT FIELD MAINTENANCE

Operators can bring in tablets and smart phones to access trend data while freely walking around the site. Data can be transferred to PC via FTP or via SD card.

TEST AND RESEARCH

Researchers can access data logged at a test lab in a remote building while working in their own office.

I/O Mapping by Modbus/TCP Master Function

Peer-to-peer connection between Modbus/TCP slaves
DI/Do and AI/Ao signal marshaling is easily set up on the DL8
Remote multiplex transmission on IP network

EASY SETUP
Simply choose input and output on the list.

TYPICAL APPLICATIONS

- Event alert
- Remote monitoring and operation
- Labor-saving maintenance
- Material refilling schedule management
- Predictive and preventive maintenance
**SC100/SC200 Series**

Multi-Function PID Controller

**Highly Visible Color Graphic LCD Intuitive Touch Panel Operation**

- Two loops of PID control
- 2 x universal inputs, 4 x analog inputs, 5 x contact or pulse inputs, 1 x high speed pulse input
- DCS in instrument format
- Auto tuning function
- Ideal for replacing existing instruments
- High reliability for demanding process use – Built-in manual loader with enhanced security features
- Host communication via Modbus Ethernet TCP/IP or RS-485 RTU
- Peer-to-peer communication via NestBus to expand number of I/Os
- IP55 front panel

**Operation and Engineering Views**

**Powerful Engineering Tools**

- **PC Configuration Software SCCFG**
  Used to configure display setting.

- **Loop Configuration Builder Software SFEW3E**
  Used to program advanced computation and sequential control function block setting.
DCS IN INSTRUMENT FORMAT – Advanced Computation and Sequential Control Functions

The control and computation functions are achieved by combining a wide variety of basic to advanced function blocks, which are normally found only in DCS systems. 2 PID blocks, 48 computation blocks and 12 sequential control blocks (1068 commands) are available for all versions of the SC Series, applicable to a wide range of application fields.

Function Block Structure

- **Control Blocks**
  - Basic PID
  - Advanced PID
  - Manual loader
  - Radio setting
  - Indicator

- **Operation Blocks**
  - Pulse Input
    - Pulse adder
    - Pulse/analogue multiplication
    - Pulse accumulator
    - Pulse input / Discrete contact output
  - Math Functions
    - Addition / Subtraction
    - Multiplication
    - Division
  - Process Functions
    - Square root extractor, Absolute value
    - Non-linear gain, Deadband
    - Lead-end output
    - Temperature/pressure compensation
  - Filters
    - First order lag
    - First order lag with two time constants
    - Ramp buffer
    - Mean average
    - Moving average
    - Lead time/dead time compensation
    - Dead time accumulation
    - Rate of Change Limit
  - Signal Limiters
    - High/low limit
    - Deviation limit
  - Signal Selectors
    - Input selector
    - Max value selector
    - Min value selector
    - Parameter selector

- **Alarm**
  - High/low alarm
  - Deviation alarm
  - Rate of change alarm

- **Others**
  - Parameter setter
  - Numeric converter
  - Weight totalizer
  - Analog/pulse duration converter
  - Signal hold
    - Max, min, momentary
  - Signal limiters
    - High/low limiter
    - Deviation limiter

- **Sequential Control**
  - Timer, Counter

- **Signal Selectors**
  - Input selector
  - Max value selector
  - Min value selector
  - Parameter selector

EXCELLENT EXPANDABILITY – Peer-to-peer and Host Communication

The SC200/SC210 has Modbus (Ethernet TCP/IP or RS-485 RTU) which enables easy connection to logging or SCADA systems on a host PC for supervising and controlling the local I/O data.

In addition, the RS-485 ‘NestBus’ enables peer-to-peer communication with other controllers and I/O devices for flexibility of I/O points.

EXCELLENT EXPANDABILITY – Peer-to-peer and Host Communication

- Torque: 10 N·m (7.38 lbf·ft)

**MSP6**
- Thrust: 500 N (112 lbf)
- Torque: 16 N·m (11.6 lbf·ft)

**MRP4**
- Thrust: 600 N (135 lbf)
- Torque: 10 N·m (7.38 lbf·ft)

**MRP5**
- Thrust: 1200 N (270 lbf)
- Torque: 24 N·m (17.7 lbf·ft)

**MRP6**
- Thrust: 1500 N (337 lbf)
- Torque: 33 N·m (24.3 lbf·ft)
PSN /PRP Series

Linear / Rotary Motion Actuator

- Brushless angle sensor eliminates problems with mechanical potentiometer feedback sensing
- Opening/closing speed, split range and failsafe position programmable by hand-held programmer
- Internal temperature sensor to control heater in cold climate and to prevent motor from overheating
- Forced-open/closed contacts for remote or manual override
- Lloyd’s Register type approved (PRP)

For OEM

**PSN1**
- IP55
- 2500 N (562 lbf)
- 3000 N (674 lbf)
- 5000 N (1124 lbf)
- 40 N·m (29.5 lbf·ft)
- 100 N·m (73.8 lbf·ft)

**PSN3**
- IP55
- 2500 N (562 lbf)
- 3000 N (674 lbf)
- 5000 N (1124 lbf)
- 200 N·m (148 lbf·ft)
- 400 N·m (290 lbf·ft)

**CSP**
- IP56
- 12000 N (2698 lbf)
- 600 N·m (443 lbf·ft)

**PRP-0**
- IP56
- 100 N·m (73.8 lbf·ft)

**PRP-1**
- IP56
- 200 N·m (148 lbf·ft)

**PRP-2**
- IP56
- 600 N·m (443 lbf·ft)

* The PRP-2 is available in Autumn 2018. Specifications are subject to change without notice.
Electric Actuator Application Examples

**BUILDING HVAC**
Cold/Hot Water Control for Fan Coil Unit

**WATER TREATMENT**
Chemical Injection Ratio Control

**ENVIRONMENTAL TEST CHAMBER**
Brine Temperature Control in an Environmental Test Chamber

**FOOD**
Gas Flow Control in Combustion System for Roasting Machine

**SHIP**
Diesel Engine Cooling System
VOS2T / VOS2T-R  2-wire Position Transmitters

- Detecting mechanical position of pneumatic and electric actuators to send a proportional 4-20 mA signal
- Linear motion type (±22.5°) or rotary motion type (±45°)
- Brushless design for long lasting reliability
- Lightweight & compact
- IP66

MEX Series  I/I Positioners

- Positioning of valve and damper can be controlled with a direct/reverse turn motor
- Remote 4-20 mA positioning input, SSR or 24 V AC dry contact switch output
- Adjustable deadband, timer, electronic limits and other additional functions depending upon models
- Modbus and LONWORKS for position setting available

Manual Loading Stations

- Holding control signals in case of computer or DCS failure
- ON/OFF signal input or analog signal input
- Manual control with an external Up/Down contact signal or with the front manual loader
- Ramp rate adjustable
**LIGHTNING SURGE PROTECTORS**

**M-Rester Series**

M-System Surge Protectors Absorb Only the Lightning Surges With No Interruption of the Instrumentation Signal

- Protecting sensors, signal and power lines, communication networks
- Excellent protection by multi-stage SPD: extra protection by a series resistance with diodes to limit current flow in addition to the discharge element at the first stage
- Each model identified by specific sensors or devices to be protected; with carefully chosen specifications to provide maximum protection
- One-port surge protectors are also available for power line protection

<table>
<thead>
<tr>
<th>Superior Selection Across a Broad Range of Sensor / Signal Types and Applications</th>
</tr>
</thead>
</table>
| • 4-20 mA & pulse signals  
• Thermocouple  
• RTD  
• Potentiometer  
• Strain gauge  
• Frequency pickup  | • RS-485 / RS-422  
• Ethernet  
• DeviceNet  
• PROFINET  
• LONWORKS  
• Multi-stage SPD for AC/DC power supply lines up to 30 amps  
• One-port SPD  
• Class I and III  
• Life monitor function for health testing  
• Plug-in base wiring for easy maintenance  
• Ultra-slim design for high density mounting  
• Hazardous location approvals |

**Life Monitor & Surge Counter**

**MAA-100 / MAA-200 / MAAC-100 / MAAC-200**

- Protects 120 Vac / 240 Vac power supply lines for up to 5 amps load current
- Life monitor function helps you to decide when you should replace the surge protector, reducing maintenance and preventing downtime.
- Alarm contact output to alert externally the surge protector’s health

**One-Port SPD for Power Supply**

**MAKF / MAT2 / MAT3**

- Connected in parallel between the power and ground lines regardless of load current
- Thermal breaker ensures degraded head element to be automatically separated from the power lines to prevent overheating.
- MAT2 / MAT3 applicable to three-phase power line in single module

http://www.m-system.com
Plug-in Base Mounted

**MDP Series**
- Lightweight, easy-to-handle, plug-in construction
- Head element can be removed and tested without disconnecting wires.
- Base socket connects input/output signals when the head element is removed.

**Ultra-Slim Housing**

**MD7 Series**
- High density mounting with 7 mm wide modules
- Max. discharge current 20 kA (8/20 μsec.)
- Floating mode for the field to avoid ground loops
- DIN rail mounting / grounding

Battery Powered Health Testing

**MDPA-24**
- Protects 4-20 mA & pulse signals
- Battery powered life monitoring function includes a “Test” button with indicators alerting panel inspectors of the surge protector’s health.

Field Transmitter Cable Conduit Mount

**MD6N-24 / MD6T-24 / MD6P-24**
- Protects 4-20 mA & pulse signals
- Directly mountable to the cable conduit of 2-wire transmitters and other field devices in an outdoor enclosure

8-port Pulse Signal Use

**MDR2**
- Protection for semiconductor switches of discrete outputs
- PNP or NPN connection
- Applicable to multi analog signals (non-isolated between channels)
- Space saving with multi-channel protectors
- LED monitor indicating degradation of voltage limiter, driven by discrete I/O signal without auxiliary power supply

PoE Plus / 1000BASE-T Ethernet Use

**MDCAT**
- Power-over-Ethernet compatible
- 1000BASE-T / 100BASE-TX / 10BASE-T
- Ideal to protect network devices powered from Ethernet such as webcams
- Conforms to IEC 61643-21, Categories C1, C2

FOCUSED NEW PRODUCTS FOR JAPAN

Products introduced in this section are only available in Japanese market or for limited release outside Japan.

HVAC Controllers for Energy-Efficient Building Managing System

- Open protocol network based
- Intelligent controller, network gateway (master) modules and economical I/O modules can be freely selected.
- DDC equipped with convenient control functions
- IEC-61131 Function Blocks

![Diagram of HVAC Controllers]

Intelligent Controller

VAV Controller
BA9-VAV

FCU Controller
BA9-FCU

LED Tubes for Replacing Fluorescent Lamps without Modification

- Direct replacement of existing lamps using the existing lamp holder
- Universally adaptable to glow tube starter, rapid start and inverter ballast types, single and dual-lamp lighting fixtures
- Energy-saving, long-life LED lamp
- Glass-free and mercury-free design for safe working condition and non-hazardous waste disposal

![LED Tubes Diagram]
Wireless I/O System for IoT

- Convenient wireless converter/gateways to collect field sensor data
- Remote monitoring using your mobile terminals via the internet
- Abnormality can be alerted via e-mails

### 900MHz ISM band wireless I/O

**WL40F Series**

- FCC Part 15 compliant
- Incorporates the module compliant with FCC Part 15, and can be used only in the US.

### Multi-port Gateway IB10W2

- 920 MHz ISM band gateway and Wi-Fi access point in one unit

### Wireless Gateway Module R3-NW1 / R3-NMW1

- R3 Series Remote I/O interfacing to 920 MHz ISM band
- Gateway to Modbus-RTU (R3-NMW1)

### Wireless I/O Module WL40W1 / WL40MW1

- Universal input type
- Discrete I/O type
- Power monitor type
- Gateway to Modbus-RTU (WL40MW1)

### Wireless Gateway Module WL40EW2 / WL40EW3

- 920 MHz ISM band gateway
- I/O mapping (marshalling) (WL40EW3)

### Tower Light IT Series

- 920 MHz ISM band gateway
- WLAN (Wi-Fi access point)

**M-System Company**

Focused New Products for Japan

- Power Transducers
- Remote I/O
- Paperless Recording System
- Web Data Loggers
- PID Control Loggers
- Temperature Controllers
- Final Control Components
- Lightning Surge Protectors

http://www.m-system.com
We have not discontinued our products without compatible replacements.

We do not easily stop manufacturing products once released in the market, without trying to supply compatible products of equal or better performance to replace with, because we believe it is an important responsibility as the world’s leading manufacturer to continue serving people who maintain the performance of process control systems. Visit M-System web site and find specifications and instruction manuals no matter how old the product, downloadable online.

We supply ready-to-install products in fast and precise delivery time.

The standard manufacturing lead time for most M-System products with customer’s specified range is 5 days. But more than quarter of the total shipments are delivered in shorter lead time, and Quick Service Center expedites more than 600 orders every month on the same day or the next day after ordered.

So do not worry too much about the standard delivery. Just let us know ‘When’ you need one of our products. They are calibrated for your exact needs with no extra charge.

Once a delivery time is promised, you can of course count on us to deliver them precisely on time.

We strive toward complete offerings with special specification products.

We offer an enormous selection of signal conditioners and remote I/Os, power monitors, paperless recorders, panel meters, surge suppressors and valve actuators, and even that may not be enough for your particular needs.

But do not give up easily. Just ask us. We continue to work toward full product offerings with special specifications without additional charge, starting with major product series. In addition, we put our effort to make them into standard selections so that they are more easily accessible to you and everyone else in the future.

We offer continued reassurance.
Always Customers First.

Based on our “Customer Creed” policy, we go beyond normal manufacturers’ obligations with our special repair service. If you suspect damage to a product by mistakes in handling, contact our Customer Center. We would be happy to check and repair it without charge. Consult M-System web site for detailed terms and conditions applicable to this service.
